OUR FOOD PHILOSOPHY

Our farm-inspired menu changes with the seasons. Our greens and fresh vegetables are grown without artificial fertilisers, pesticides or chemicals and freshly picked from the Spier Food Garden.

Our meat comes from pasture-reared animals, raised by Farmer Angus right here on the farm without the use of antibiotics or hormones. The cattle are grass-fed and pigs enjoy organic food waste from our kitchens. Farmer Angus also supplies us with eggs, laid by hens that roam freely in our outdoor fields.
